

Md Azizul Islam

Software Engineer | Java | Spring Boot | Spring Security | Microservices | Docker | React

Dhaka, Bangladesh | +8801849632923 | azizularif94@gmail.com | github.com/Azizul-arif | linkedin.com/in/azizul-arif-494912199

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of professional experience designing and developing enterprise web applications using Java, Spring Boot, and React, applying SOLID principles and system design practices within Agile/Scrum teams. Strong hands-on experience in Spring Boot REST API development, Spring Security, JWT-based authentication, role-based access control (RBAC), JPA/Hibernate, relational database design and production support. Built a full-stack role-based workflow platform using Spring Boot and React, with access/refresh token authentication, secure API endpoints, layered architecture, JPA/Hibernate persistence and Redux Toolkit Query integration. Familiar with microservice architecture, distributed systems fundamentals and Docker-based development.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, TypeScript

Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, JWT, JPA/Hibernate

Architecture: Layered Architecture, Microservices, DTO/Entity Separation, RBAC

Database: MySQL, PostgreSQL, SQL Server

Frontend: React, Redux Toolkit Query, Angular, Tailwind CSS, Material UI, jQuery

DevOps & Tools: Docker, Git, GitHub, Maven, Swagger/OpenAPI

Other: API Integration, Reporting, Requirement Analysis, Production Support

Practices: SOLID Principles, System Design, Design Patterns, Agile (Scrum/Kanban)

PROFESSIONAL EXPERIENCE

Synesis IT — Software Engineer

Feb 2024 – Present

Bancassurance System

- Designed and developed secure RESTful APIs using Java and Spring Boot for enterprise business workflows.
- Implemented JWT-based authentication and role-based access control (RBAC) using Spring Security, enforcing method-level and endpoint-level authorization through role/permission-mapped access rules.
- Designed relational database structures and persistence mappings using JPA/Hibernate, managing multi-step business transactions with Spring's @Transactional for data consistency and rollback handling.
- Developed SMS notification workflows and business reporting functionality.
- Participated in Agile/Scrum-based requirement analysis, sprint planning and production support; applied SOLID principles and system design practices, and contributed to code reviews while informally guiding junior engineers.

Contract Farming System

- Developed Spring Boot backend APIs and designed database structures supporting business workflows and functional requirements.
- Collaborated with Angular frontend development for API integration.
- Implemented application enhancements and resolved production issues.

eTIN System

- Developed and maintained backend modules and REST APIs using Spring Boot with layered architecture.
- Implemented reporting features, enhancements and production bug fixes.

TVS Auto Bangladesh — Executive (Software Development)

Aug 2021 – Jan 2024

Dealer Wallet — Internal Enterprise Application | .NET, jQuery, Bootstrap, RDLC Reporting

- Designed and developed an internal enterprise application using .NET and jQuery, supporting dealer operations and business workflows.
- Developed dealer operations, sales and inventory management features.
- Built RDLC-based business reports to support operational decision-making.
- Provided production support, maintenance and application enhancements.

FEATURED PROJECT — FLOWOPS

Role-Based Task Management & Workflow Platform | Spring Boot, Spring Security, JWT, React, Redux Toolkit Query, JPA/Hibernate, MySQL, Docker | GitHub: github.com/Azizul-arif/FlowOps

- Designed and developed a full-stack task management platform with secure Spring Boot REST APIs and React frontend.
- Implemented JWT access-token and refresh-token authentication with Spring Security and protected API endpoints.
- Implemented role-based access control (RBAC) for application authorization.
- Built Controller-to-Service-to-Repository architecture with DTO and entity separation.
- Implemented modules for users, roles, departments, designations, projects, project members, tasks, comments, attachments and task history.
- Designed JPA/Hibernate entity relationships and relational persistence for application modules.
- Integrated backend APIs with React using Redux Toolkit Query for authentication, profile retrieval and CRUD workflows.
- Applied Docker and microservice-oriented architecture concepts during application development.

EDUCATION

B.Sc. in Computer Science & Engineering — United International University | Graduated 2019
